South Africa

ECONOMIC GROWTH (%)

Economic growth is expected to recover, with an estimated acceleration of 2.4 percentage points to 2.8% in 2024. The non-oil sector should make the main contribution to growth.

GDP GROWTH (%)

The growth of the non-oil sector may reflect the implementation of projects such as Diversifica Mais, which will be in place until 2029 and is financed by USD 300 million from the World Bank.

INFLATION RATE (%)

The inflation rate should slow down in 2024 to 15.3%, down from 20.01% in 2023. The slowdown in inflation may reflect the tightening of monetary policy and the moderate withdrawal of fuel subsidies.

Angola

EXCHANGE RATE (USD/AOA)

The exchange rate depreciated significantly in 2023, reflecting the reduction in the supply of foreign currency on the foreign exchange market compared to the previous year. For 2024, the outlook for depreciation remains moderate compared to the depreciation of 2023.

TRADE BALANCE (% GDP)

Trade balance is expected to remain positive in 2024, but its weight in the GDP may moderate. The performance fundamentally reflects the reduction in oil exports, in line with the reduction in oil production in Angola.

CURRENT ACCOUNT (%GDP)

The current account balance may moderate slightly, pressured by the reduction in oil exports and the continued need for imports.

FISCAL BALANCE (% GDP)

The fiscal balance could improve slightly in 2024, reversing the negative performance estimated for 2023, standing at 0.02% of GDP, in line with the commitment to improve spending and moderate revenue.

GOVERNMENT DEBT (% GDP)

Nominal GDP growth should help reduce the debt ratio to levels close to 70% of GDP this year.

ANGOLA RATING

The main rating agencies maintained the country's rating, but downgraded the outlook from positive to stable, as a result of the expectation of moderation in oil tax revenues and uncertainty about economic growth in 2023.

Agency	Rating	Outlook	Date
Moody's	B3	Positive	24/10/2023
Fitch	B-	Stable	15/12/2023
S&P	B-	Stable	18/08/2023

BANK ASSETS

Total assets increased by 18.60%, influenced by the impact of exchange rate depreciation on the foreign currency components of assets.

BANK DEPOSITS

Total deposits in the system recorded a variation, growing by 30.01% to AOA 18,111.63 billion, of which 43.86% were demand deposits.

CREDIT (% OF ASSETS)

The weight of credit over total assets increased as a result of loans growing more than total assets.

DEBT SECURITIES (% OF ASSETS)

The proportion of debt securities in the composition of assets was once again above 30%, in line with the outlook for higher returns on Government Securities.

Institutional

ATLANTICO was established on August 31, 2006, and began operations in November of the same year, as a banking institution under Angolan law, regulated by Banco Nacional de Angola. On May 3, 2016, Banco Millennium Angola was merged into ATLANTICO as a result of a merger process. This operation allowed the integration of the operations of both banks, which had more than 20 years of experience and had been acting as partners since 2008, as the result of the cross-holdings between the two banks. Through the merger process, ATLANTICO has strengthened its universal nature and reinforced its position in the Angolan banking market. It is now one of the top 5 largest banks and one of the main private banks in financing Angolan Companies and Families, a promoter of digital innovation and focused on financial inclusion, the creation of an ecosystem of partnerships, including with international counterparts, and the promotion of a more sustainable business environment.

Shareholder Structure

Banco Millennium Atlântico, S.A. is mainly owned by private Angolan shareholders. As at December 31, 2023, ATLANTICO had the following shareholder structure:

Promoter of **digital innovation** and focused on **financial inclusion**, the creation of an **ecosystem of partnerships**, including with international counterparts, and the promotion of a **more sustainable business environment**.

ESG | Environmental, Social and Governance

Environmental sustainability

ATLANTICO believes that an excellent environmental performance is a distinguishing factor and a fundamental prerequisite for sustainable development. In this sense, it has been working continuously in the implementation of the Environmental and Social Management System (SGAS) policy, to provide the proper support to sustainability projects, environmental balance and social impact, as well as to contribute to the prevention of accidents along the way that could negatively influence the materialization of projects, maintaining the international socio-environmental standard (Equator Principles).

The commitment to sustainability, based on digital transformation and a culture of efficiency, has allowed us to reach important milestones in optimizing consumption, resulting in significant economic, sustainability, and productivity gains.

ESG | Social

Focus on social transformation

Social transformation is a founding pillar of ATLANTICO, and sharing the results of its activities with the communities it serves, leaving a significant impact on society.

As part of this strategy, ATLANTICO aims to impact communities not only through financial contributions but also through knowledge sharing and financial inclusion. The goal is to achieve high levels of bank access and transactional capability through *400# Agiliza.

OBJECTIVE

1. **Teachers:** provide teachers with the training they need to deliver quality teaching that contributes to the holistic development of each student.
2. **School Managers:** provide principals with training to promote efficient management of resources.
3. **Infrastructures:** help improve and maintain the infrastructures that are essential for the proper functioning of the schools that are part of the project.
4. **Students:** promote student-centered learning, supporting the formation of students who are protagonists and agents of transformation towards global citizenship.

ENTREPRENEURSHIP | DOMBE 4.0

OBJECTIVE

- Enhance models of inclusive development based on rural property
- Support rural households through training programs
- Technical assistance and agricultural management
- Promote production and the rural community in the formal market
- Attract young Angolans to the primary sectors

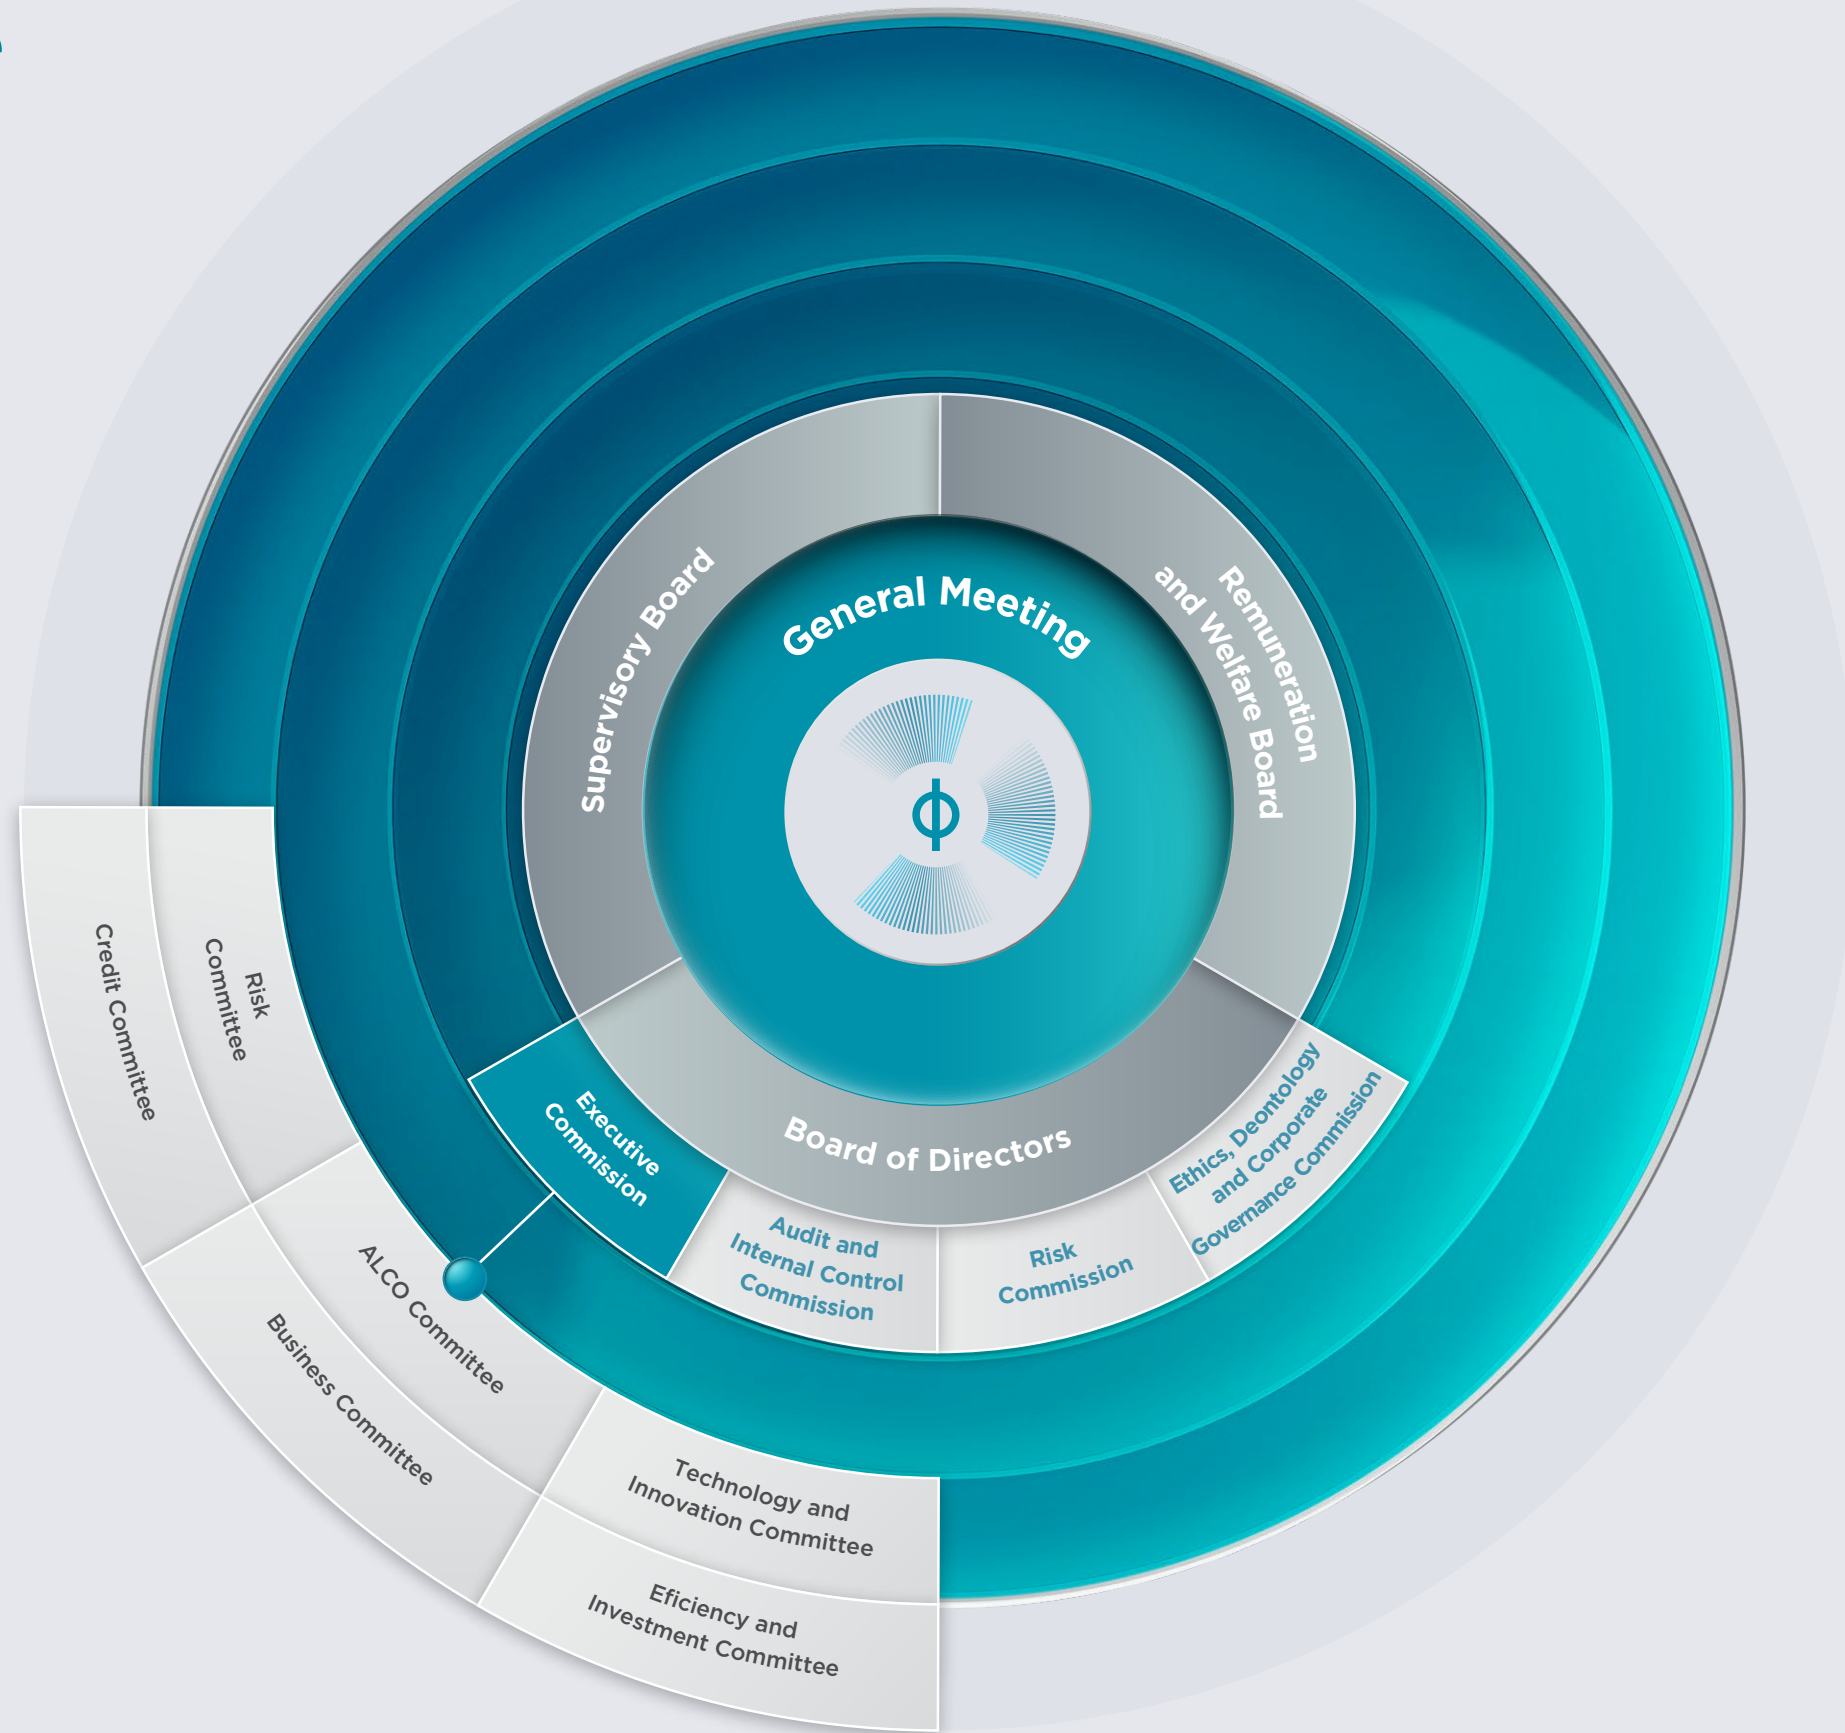

SCOPE OF ACTION

- Farming families in Dombe Grande commune, Benguela province.
- The aim is to replicate the model in other regions of the country.

ESG | Governance

Government Model

Resilience | Risk culture

Cyber risk

As part of its strategy and in line with regulations, ATLANTICO, has been working on the implementation of best market practices for the systematization of control objectives within the global operational risk management matrix, aimed at ensuring that systems, data and customers are protected from the growing risk and scale and sophistication of cyber attacks.

ATLANTICO increasingly relies on automation and machine learning technologies for event analysis to cope with ever-changing threat scenarios. The approach adopted to mitigate cyber risks comprises strongly Talent-focused procedural, technological and organizational controls.

ATLANTICO's focus on systemic risk has been on building better cyber preparedness and resilience, mitigating points of failure, and ultimately minimizing the negative effects stemming from cyber offensives that could jeopardize the Bank and the ecosystem to which it belongs.

-  New policies, processes, manual and rules approved and implemented.
-  Identification of cyber risks that can affect ATLANTICO business objectives. Attack simulation
-  Campaigns sent to employees and awareness campaigns.

Compliance

"Use of international best practices for the prevention and identification of money laundering, terrorist financing and weapons of mass destruction proliferation practices."

The compliance activities focus on the promotion, definition, approval and implementation of policies and processes aimed at ensuring that management bodies, functional structures and all Employees comply with the legislation, rules and regulations (internal and external) that guide the Bank's activities.

- Use of internationally recognized best practices, the Angolan laws, and cooperation policies with regulatory entities in charge of combating this type of practices.
- Prevention approach to this type of practice, covering the Bank's Customers, correspondent banks and transactions. Based on the assessment of Customer characteristics obtained during Know your Customer (KYC) processes and transactional profile during the course of the business relationship.
- Automatic screening systems of the Customer database against Sanctions and PEP lists using the following AML software: AML by ASSECO, FircoTrust, FircoContinuity.
